

## **Swainswick History concepts**

Whole school definition: History is the study of the past, in particular the changes over time that have occurred within human society.

## Key concepts

**Eight key concepts** of history repeat throughout the curriculum. (In brackets, you will see other important related concepts.) These provide lenses through which to consider the different aspects of history:

community & culture - (architecture, art, civilisation, communication, economy, inspiration, myth, nation, religion, settlement, story, trade)

conflict & disaster - (conquest, liberation, occupation, military, peace, plague, surrender, treaty, war)

hierarchy & power - (country, democracy, empire, equality, government, law, monarchy, oppression, parliament, peasantry, politics, prejudice, slavery, poverty, protection, tyranny)

cause & consequence

change & continuity

similarity & difference

evidence & interpretation (eye-witness, source)

significance

second order concepts (i.e. those relating to the disciplinary knowledge of history)

<u>Concept</u>	Why learn this concept?	Year group
Community & culture - (architecture, art, civilisation, communication, economy, inspiration, myth, nation, religion, settlement, story, trade)	past. It involves the attitudes, beliefs, values and views of a group of people in history. It will allow historians the opportunity to reflect and examine how communities have been influenced by people or	
Conflict & disaster - (conquest, liberation, occupation, military, peace, plague, surrender, treaty, war)	Conflict is the process of actual or perceived opposition between individuals or groups. This could be opposition over positions, interests or values. Historians distinguish between non-violent and violent conflict. In this distinction, non-violent conflict can be a useful mechanism for social change and transformation, while violent conflict is harmful and requires resolution. Disagreements and conflict can occur in our everyday lives. Our children will learn about the impact and consequences that conflict which goes unresolved has had upon our world, nation and local area.	<u>3-6</u>
Hierarchy & power - (country, democracy, empire, equality, government, law, monarchy, oppression, parliament, peasantry, politics, prejudice, slavery, poverty, protection, tyranny )	Democracy is a system of government in which laws, policies, leadership, and major undertakings of a state or other policy are directly or indirectly decided by the "people". The word democracy describes a form of government. The word comes from two Greek words that mean "rule by the people." In a democracy the people have a say in how the government is run. They do this by voting, though there are usually rules about who can vote.	<u>1-6</u>
Cause & consequence	Cause and effect can be defined as the process historians use to identify a chain of events. Its objective is to identify, examine and analyse the reasons why events have happened and then the consequences of the event. It is useful to think of the concept in terms of 'why' and 'what'. Sometimes the link is clear but not always. Usually there are many reasons that lead to an episode or act. There can also be many outcomes. Often the outcomes are easily identifiable but sometimes they are difficult to predict and on some occasion may not be detected until long after the event.	<u>3-6</u>
Change & continuity	Historians recognise that over time some things stay the same, while others change. This concept is referred to as continuity and change. Examples of continuity and change can be seen across every civilisation and any given period of time. Many aspects of history influence how we act and live today. Change can occur within a certain civilisation or specific time period, but also across different civilisations and time periods. 'Change' refers to something that is obviously different from what occurred previously.	<u>1-6</u>

Similarity & difference	Similarity and difference is based upon an understanding of the complexity of people's lives, differing perspectives and relationships between different groups. Asking how similar or different allows pupils to draw comparisons across people, their perspectives, motivations and actions as well as across time and space, helping children to develop a greater understanding of modern global society.	EYFS, 1-6
Evidence & interpretation (eye-witness, source)	Evidence is an important part of historical inquiry and refers to the information that is collected from various sources. It can come in many different forms, from an individual account, letters, photographs, paintings, clothing. Any object from history can be classed as evidence and used then to hypothesis and allow historians to piece together the past. Evidence can be separated into two categories, primary evidence and secondary evidence	<u>1-6</u>
Significance	Significance can be defined as anything that has a bearing on a situation. This could be a person who shaped what came after them, an event that had an effect on things that followed or place. The importance or significance of a person, place or event defines and influences the way that the past is remembered.
